1. Use - case Diagram

- **Use - case Documentation**

Use case name: Issue Book

Description: Represents the process

Issuing book Primary Actors: Registered

Students

Secondary Actors: Library, Librarian

**Pre-conditions:**

- Registered student must be logged in and authenticated by the librarian.
- The book being issued must be available in the library.

**Post-conditions:**

- The book is marked as issued to the student.
- The due date for returning the book is set.
- The student is notified of the successful issuance.

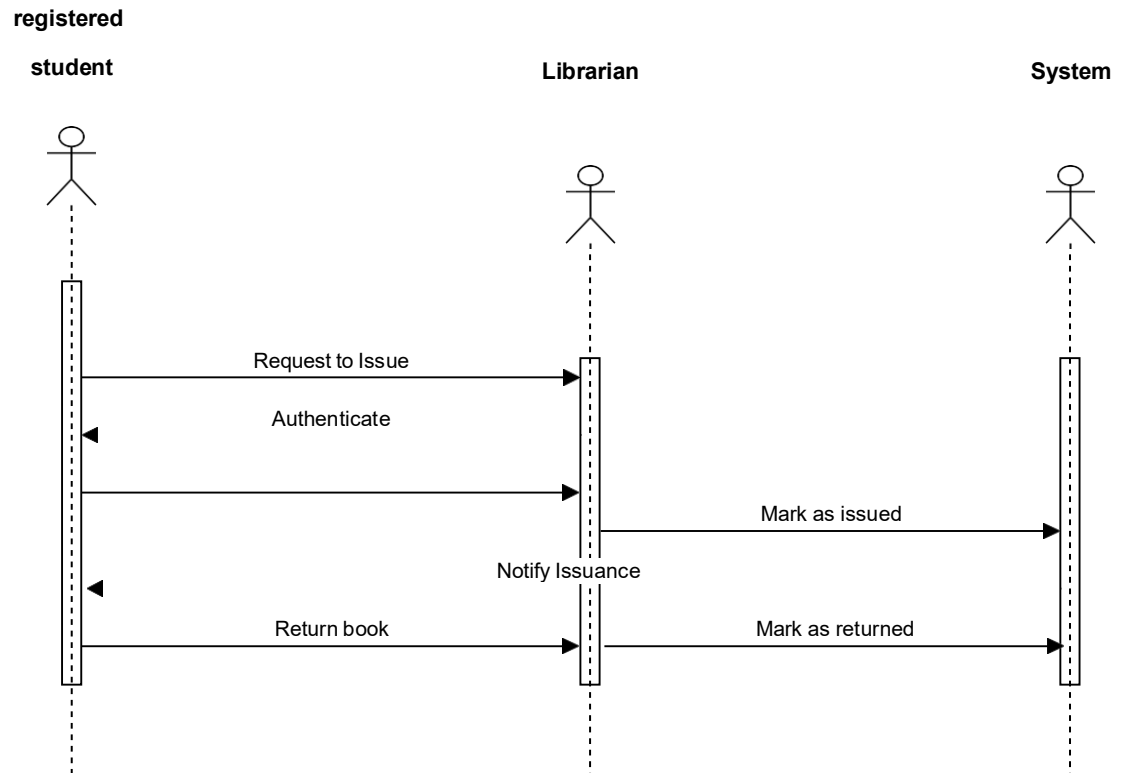

**Main flow:**

- The registered student requests to issue a book.
- The system validates the student's authentication status.
- The system checks if the requested book is available.
- If the book is available, the system marks it as issued to the student.
- The system sets the due date for returning the book.
- The system notifies the student and the librarian about the successful issuance.

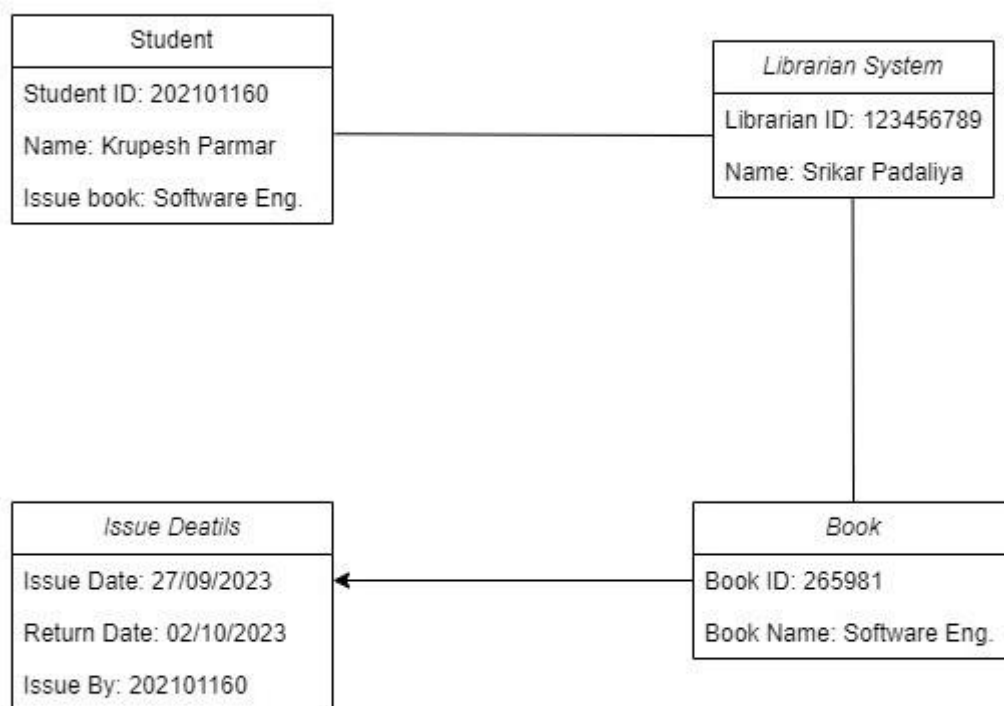

**Alternate flow:**

- If the book is not available, the system notifies the student that the book cannot be issued at the moment.
- If the user is not authenticated, the system notifies the librarian
